PROFESSIONAL SUMMARY

Results-driven technical professional with 2 years of experience in a startup environment combining web development, application support and system troubleshooting. Experienced in supporting production systems, collaborating with engineering teams, and resolving user and system issues. Strong analytical skills with a focus on system reliability, technical evaluation, and informed decision-making.

TECHNICAL SKILLS

Programming & Web Technologies

- JavaScript (ES6+), TypeScript
- React.js
- HTML5, CSS3, Tailwind CSS

Application & Production Support

- Application Troubleshooting
- Incident & Issue Resolution
- Production System Support
- Root Cause Analysis (RCA)
- User & Stakeholder Support

Infrastructure & Cloud

- AWS (EC2, S3 – basic administration)
- Server Monitoring & Maintenance

Platforms & Tools

- Git, GitHub (version control)
- WordPress (Elementor)
- Shopify (E-commerce management)

Databases

- MySQL
- SQL (queries, joins, basic optimization)

Environment

- Citrix (exposure)

WORK EXPERIENCE

Web Developer (Startup Environment)

Devs Hideout PH | February 2024 - Present

- Developed, maintained, and supported production web applications using React.js, TypeScript, and Tailwind CSS
- Built reusable and responsive UI components while ensuring performance and usability standards
- Implemented and customized WordPress (Elementor) websites and managed Shopify/WooCommerce e-commerce platforms based on business requirements
- Integrated frontend applications with MySQL-backed APIs and supported deployment workflows
- Deployed, monitored, and maintained applications on AWS, ensuring availability and system stability
- Provided application support by investigating and resolving user-reported issues through root cause analysis, coordinating with engineering and stakeholders as needed

Application Analyst

ECLARO | September 2023 – January 2024

- Provided support for enterprise-level applications and internal user portals
 - Assisted users with authentication, document uploads, and system navigation
 - Documented issues and gathered technical information to support resolution
 - Gained exposure to enterprise systems and Citrix-based environments
 - Strengthened troubleshooting, communication, and system analysis skills
-

EDUCATION

Bachelor of Science in Information Technology

University of Caloocan City

Graduated: 2019 - 2023

KEY PROJECTS

E-commerce Web Application

- Built using React.js, TypeScript, and Tailwind CSS
- Implemented product listing, cart, and checkout functionality
- Integrated backend services using MySQL
- Deployed and hosted on AWS

Company Website

- Built and maintained the company's official marketing website
- Implemented reusable UI components using React and TypeScript
- Deployed and maintained the site on AWS

Business Website – MRR

Tech Stack: HTML, CSS, JavaScript

GitHub: github.com/angelo0908/mrr_website

- Developed a responsive business website for a client-facing use case
- Implemented clean UI layouts and cross-browser compatibility

Public Figure Website

Tech Stack: WordPress (Elementor), Custom CSS

- Developed responsive websites using Elementor
- Optimized performance and mobile responsiveness
- Enabled client-managed content updates
